WE ARE MEDIAL

OUR MISSION

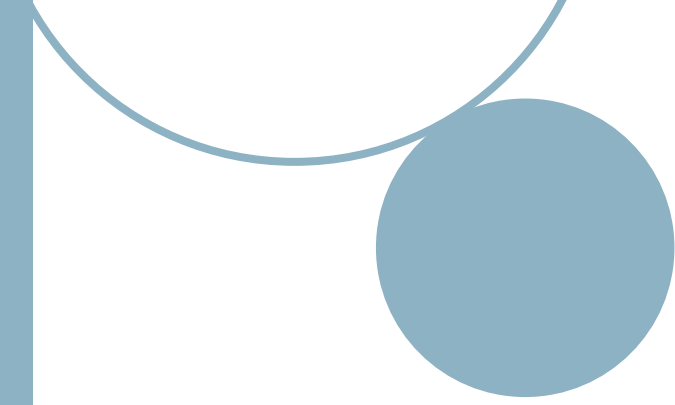

With our products, we aim to **care for workspaces, for people, for the Planet.**

'**Keep it Clean, Keep on Caring**', for us, is not just a promise, but a credo that we apply to our living and working every day.

OUR VISION

For us, **making clean means making better.**

That is why we want to continue to strive, through our activities, to **provide professional quality solutions for the hygiene, conservation and decoration of public spaces on a global scale**, reducing our impact on the environment to contribute to a cleaner Planet.

Dear reader,

*we are delighted to find you again or to find you for the first time. We have decided to innovate our **2025 Catalogue** in honour of the **company's 40th anniversary**. Our aim is to reach out to you and make it easier for you to read our catalogue. This is the reason why **our product universes, have become three:***

WASTE MANAGEMENT, HYGIENE and FURNISHING ACCESSORIES.

*Within the large **Waste Management** umbrella, we wanted to simplify the search to identify **SPACES** first and foremost, whether they are **INDOORS** or **OUTDOORS**. In a second plan, our product portfolio have been defined according to destination and type of use, whether it be **HORECA, CLEANING, WASTE SORTING** or **COMMON AREAS**.*

*The **Hygiene** universe has also undergone renovation, in fact the subdivision into **DISPENSERS AND HOTEL ACCESSORIES, HAND & HAIR DRYERS, PERSONAL CARE** and **ENVIRONMENTAL CARE** can guide the product search based on actual needs.*

*The last and new category **Furnishing Accessories** represents our area of growth, in fact it will be replenished over the years with the aim of having a catalogue more and more specialised in the generalist field.*

We have also introduced a digital index using QR codes to make it easier to find products!

Enjoy exploring,

Medial

LEGEND

This year more than ever, it is important to use icons to better understand the characteristics of our products. The icons will in fact complement the product descriptions in text form. Here follows the legend, an essential key to having all the information at your fingertips.

			
 New product	 Bag for waste bin	 Screws included	 Automatic operation with Infrared sensor
 Good quality - price ratio	 Container's capacity	 Screws not included	 Self-extinguishing
 Key lock system with key	 Liquid soap	 Battery power supply x Number of batteries (Included)	 Suitable for use in covered outdoor areas
 Vandal proof	 Foam soap	 Battery power supply x Number of batteries (Not Included)	 Ideal for naval supplies
 Window for level check	 Spray soap	 Power supply (Included)	 Warranty Period
 Product to encourage waste separation	 Towels Paper folding	 Power supply (Not Included)	 Integrated ozone generator
 Anti Finger-Print treatment	 Diameter paper roll	 USB power supply (USB cable included)	 Possibility to customize product configuration
 Waterproof design	 Interfolded paper	 USB power supply (USB cable not included)	 Flying insect killer
 Scent		 Wi-Fi System	

Certifications and compliance

 In compliance with CE regulation	 TUV UNI EN 840 certified
 In compliance with HACCP plan	 TUV DIN EN ISO 9001 certified
 In compliance with ROHS regulation	 GS certified Security test
 CNPP certified	 Level of Acoustics Power

Sustainability

 Recycled Plastic	 Plastic Second Life
 Biodegradable material	 100% Regenerated Nylon
 GOTS certified	

OUR VALUES

WE TAKE CARE OF OUR PRODUCTS, AND OUR CUSTOMERS

Over a thousand products in the catalogue, **guaranteed by 40 years of experience** and a leading company in the cleaning and metalworking sector. We offer not only a careful selection of products, but also a careful listening to customers' needs and a customised service that makes us unique.

WE CARE FOR THE PLANET, AND THE PEOPLE WHO LIVE ON IT

Sustainability is important to us: we have chosen photovoltaic systems with the aim of producing clean energy and reducing greenhouse gas emissions. In addition, we are always looking for innovative green oriented solutions, and we give as well space to PSV (Plastic Second Life) products. Because we only have one planet, and we want to respect it.

KEEP IT CLEAN, KEEP ON CARING.

OUR HISTORY

CLEANING SPECIALISTS SINCE 1985

We were founded 40 years ago with the aim of **offering the best selections for professional hygiene and cleaning**. Over time we have expanded our offer, without ever losing our focus on quality and with the aim of **satisfying increasingly complex needs**.

In forty years we have grown, combining a **Made in Italy** touch and taste with a Global vision that has allowed us to expand in Europe and beyond. And today, we continue to bring Medial quality to the World.

OUR EXPERTISE IN METAL PRODUCTS, FOR THE HIGHEST QUALITY

In 2008 we acquired **Metalnova**, which allowed us to specialise in the production of **metal** containers and dustbins. More than 15 years of experience in this type of work have created the foundations for the conception of a unique know-how with an offer of **high quality metal** products alongside other plastic references, for an all-round proposal always oriented towards **product durability and functionality**.

OUR STRENGTH

Our strength is **quality**: **from design to sale**, we offer the utmost attention to the product and the customer.

STUDIO & DESIGN

Experience and innovation come together to create a product offering that combines design and functionality.

QUALITY/CERTIFIED PRODUCTION

Two production sites for maximum optimisation of internal processes and products guaranteed by ISO 9001 certification.

LOGISTICS

Over 10,000 m² of warehouse space with more than 350,000 items in stock, with a carefully planned flow of goods to ensure timely deliveries. Thanks to the new Warehouse Management System (WMS) we can guarantee even more picking accuracy, reducing lead times and maximising productivity.

SALES NETWORK

An extensive network in Italy and Europe, always ready to listen and satisfy our customers' needs.

OUR TECHNIQUE

We give shape to your ideas: with our **customisation services** with the most **innovative** techniques.

● PAD PRINTING

Perfect for customising irregular or spherical surfaces with optimal results at low prices.

● SCREEN PRINTING

For optimum colour rendering even on non-absorbent materials or surfaces that are not perfectly smooth.

● DIGITAL TRANSFER

Digital printing for excellent results even in four-colour process with sharp and brilliant colour rendition.

● LASER CUSTOMIZATION

3D laser engravings for the optimal reproduction of graphic elements, thanks to the in-house presence of the machinery, which allows maximum control of the output, resulting in an accurate and quality result.

SUSTAINABILITY: OUR PRESENT, OUR FUTURE.

TOWARDS TOMORROW WITH A NEW ENERGY

We believe in sustainability, and take concrete actions every day to help **reduce our impact on the environment**. This is why we have chosen to invest in **photovoltaics**, and make our factory greener by **producing clean energy and reducing greenhouse gas emissions**.

Today, in the Medial factory, we have photovoltaic panels with a maximum power of 140KW, which contribute to making us - in our small way - an **integral part of the transition process towards renewables**.

And this is just a first step in a path that we intend to continue along in the coming years with **actions aimed at reducing our impact on the environment**.

WE REUSE
ENERGY

WE SAVE **Co²**

RECYCLING IS CREATING.

A SECOND LIFE TO PLASTICS

The Institute for the Promotion of Plastics Recycling (IPPR) has established the **PSV Plastics Second Life certification**, an environmental certification that enhances the value of products resulting from the recycling of household and post-industrial plastic waste, thus emphasising **the quality and traceability of recycled materials**. They can be found in the catalogue thanks to the 'Plastic Second Life' logo.

A CHOICE OF QUALITY

Quality is always our goal. And we do not only mean the quality of products, but also of life. This is why, we have included in our waste bin product portfolio the **recycled plastic ranges ECOCONTI, STILECO, ECO RIF and BASKET**, in which quality and functional aesthetics are combined with a sustainable vision of the future. For the furnishing accessories, our entrance mat range such as **AQUA, DELTA** and **DURATAP** are made with **ECONYL, 100% regenerated nylon**.

OUR PARTNERS

3M

Our Partnership with 3M, which began in 2016, continues to grow in the area of **professional cleaning, maintenance and safety**, with a new specific focus on the development of complementary and related sectors to Cleaning such as hardware, marinas and more generally the whole world of industry as well as large-scale distribution.

Currently, the 3M range distributed by Medial includes: non-slip products, microfibre cloths, sponge laminates, green fibre.

From 2021, our chemical division. A chemical company founded in 1999, specialising in the production of professional detergents and perfumers for industrial environments, HO.RE.CA., sanitary cleaning, the food industry, mobile toilets, the nautical industry and means of transport.

TRADE FAIRS AND EXHIBITIONS

International trade fairs are an opportunity to showcase our expertise and capabilities. For this reason, Medial actively participates in the most relevant industry events.

Among the unmissable appointments: **INTERCLEAN in Amsterdam**, a global reference point for the cleaning and hygiene sector, and **PULIRE in Rho Fieramilano**, the event dedicated to professional cleaning and sanitation, supported by **ISSA and Afidamp**.

We look forward to seeing you again this year at the 27th edition of PULIRE to celebrate our 40th anniversary in **Hall 12, Stand F27 G20!**

BECAUSE **40 YEARS** ARE NOT TO BE CELEBRATED, THEY NEED TO BE BUILT. **STEP BY STEP**, TOGETHER.

WASTE MANAGEMENT

WASTE MANAGEMENT IS A PROCESS CONSISTING OF THE ACTIVITIES OF COLLECTION, TRANSPORT, TREATMENT AND DISPOSAL, AS WELL AS THE RECOVERY OR RECYCLING OF MATERIALS SUCH AS PAPER, PLASTIC, WOOD, GLASS, METAL.

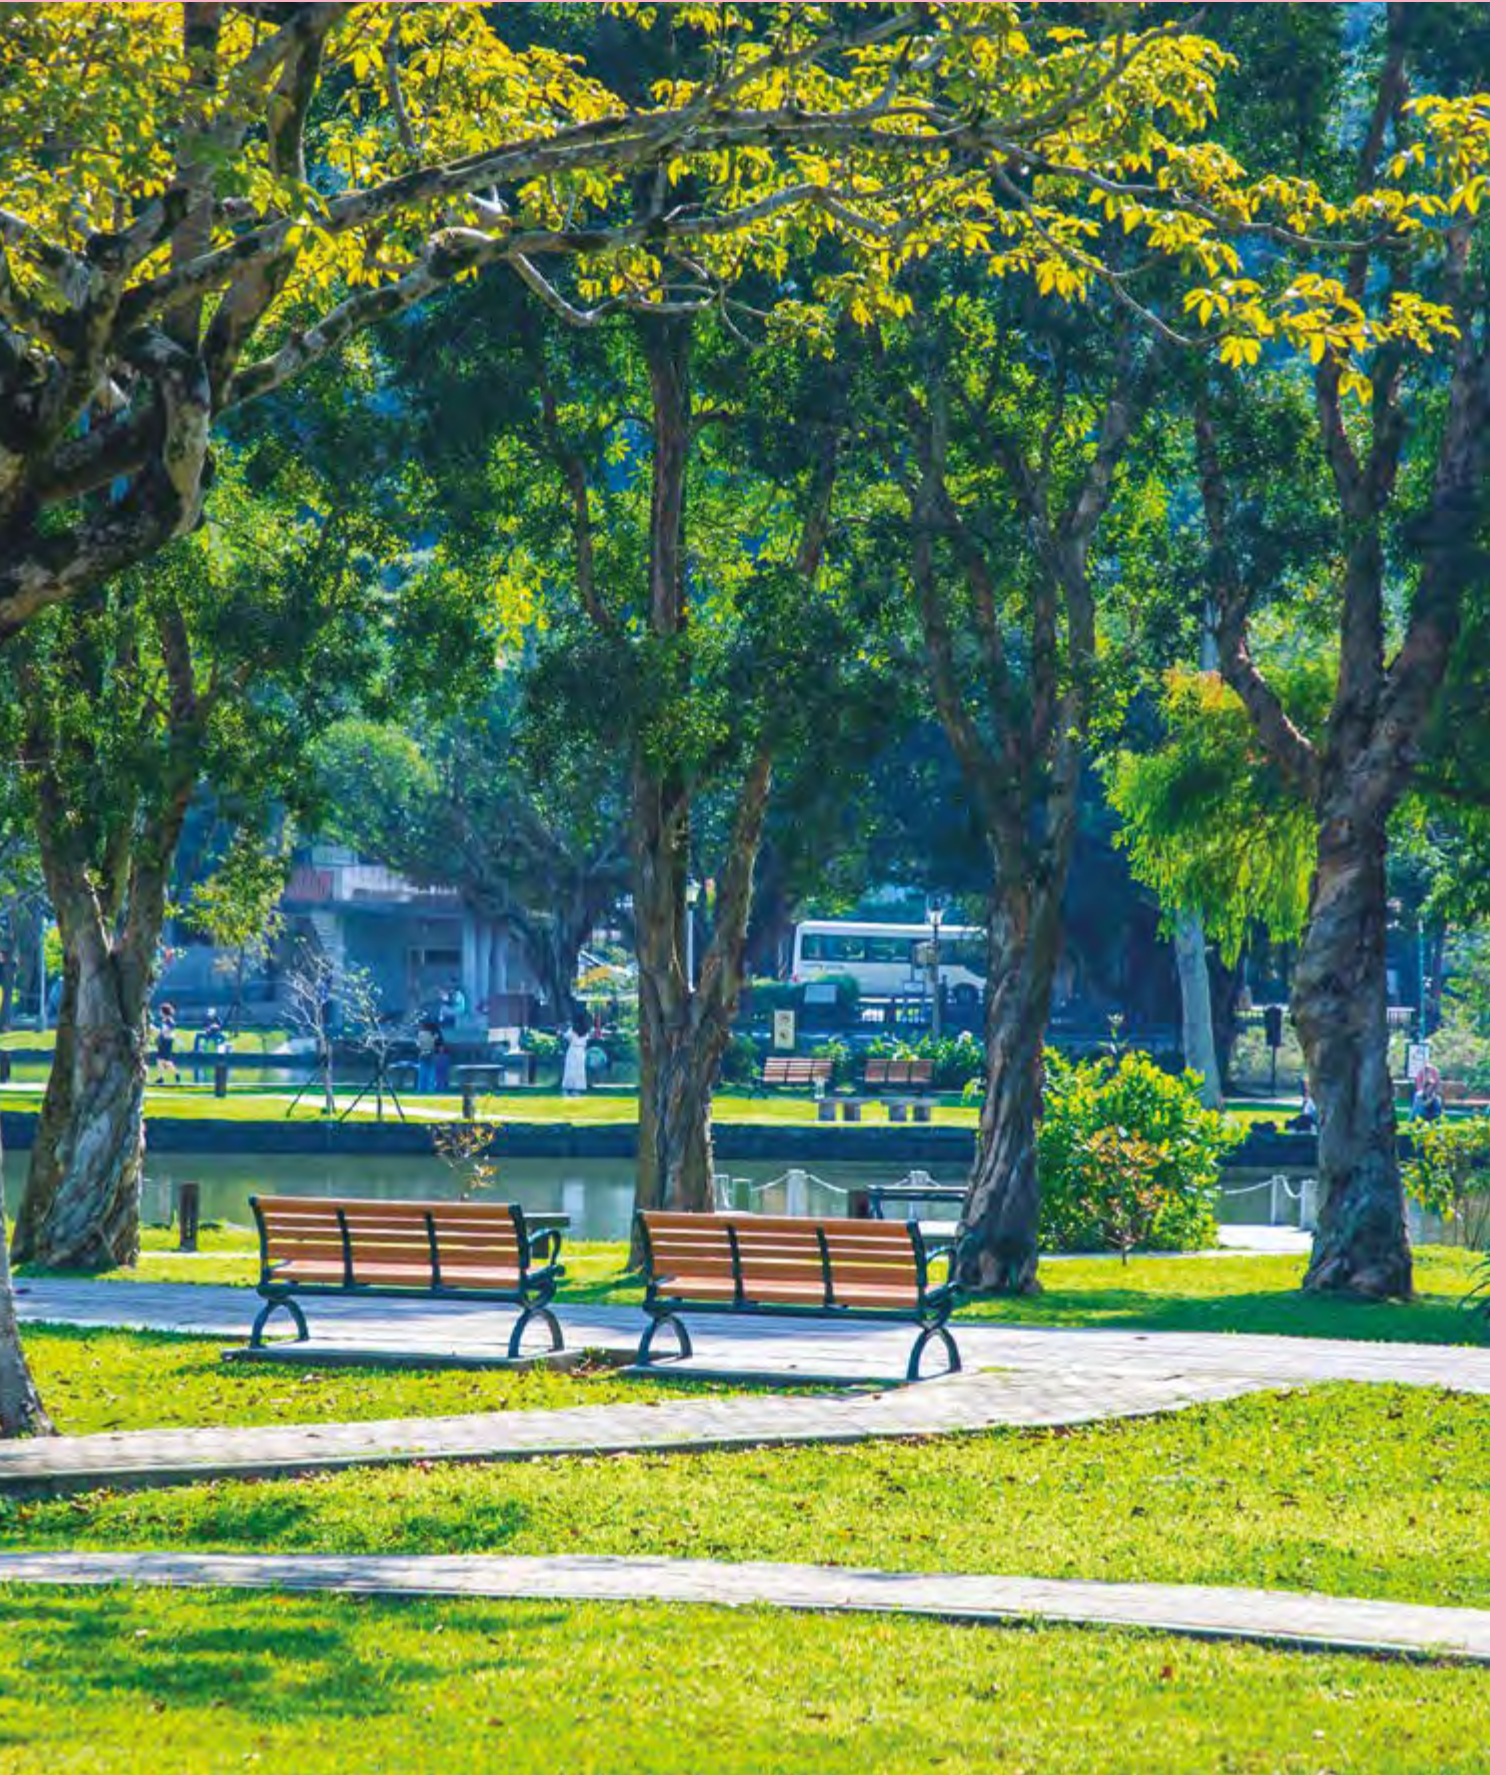

The fundamental principle behind waste management is the **protection of health** and this concept is represented in MEDIAL's mission as **the care and preservation of both indoors and outdoors public spaces.**

The choice of waste collection instrument therefore becomes crucial due to the different uses and destinations that are represented for Medial as Horeca, Cleaning, Waste sorting and Common areas. For each environment, in fact, there are standards to be met at the level of the material identified, certification or regulations to be expected, product capacity or facilitation for the purpose of use.

The solutions that Medial can offer advocate the promotion of the circular economy through the use of recycled materials for dedicated ecological lines, and the management of any dangers that may arise through the choice of non-fire-propagating waste containers and many other proposals designed to improve the well-being of people's lives. Waste management is an activity that requires careful planning and compliance with strict **regulations** to ensure the **protection of human health and the environment.**

For this reason Medial wants to accompany people in a path of quality and support towards civilised and responsible practices that tend to contribute to the protection of the Planet.

WASTE MANAGEMENT

INDOOR AREAS

Medial hopes to be able to qualify with an increasingly broader offer that responds, in terms of versatility and extension, to the needs of its customers. For this reason, the chapter on WASTE MANAGEMENT has been rationalized firstly including both products for **INDOOR AREAS** and equipment for OUTDOOR AREAS.

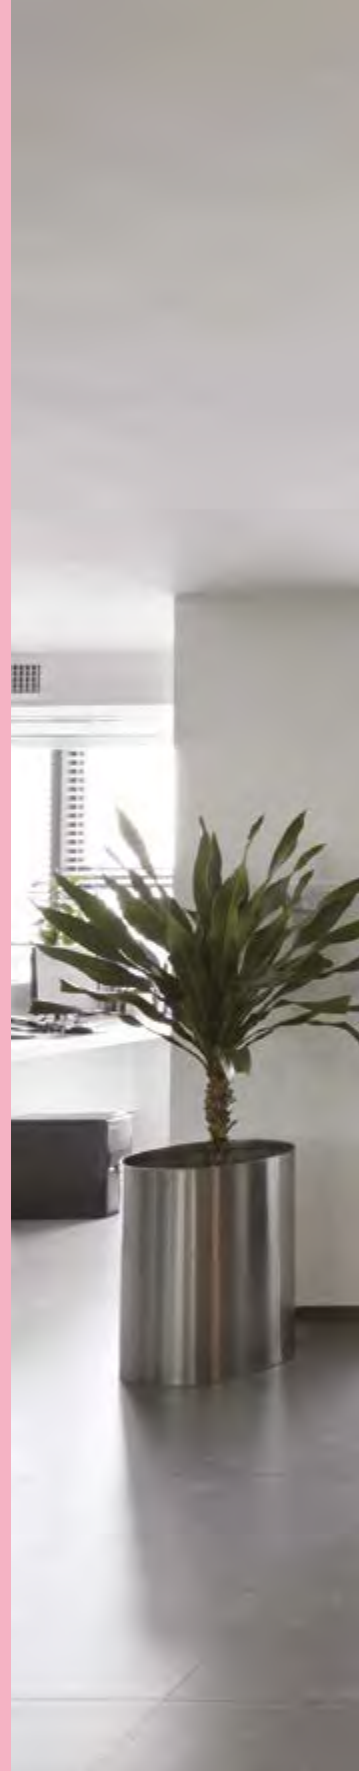

The second classification is based on the **intended use** of the product. This gave rise to the subcategories HORECA, CLEANING, WASTE SORTING and COMMON AREAS.

HORECA refers to the hotel industry sector for which products whose main use is in the Catering and Hotellerie sector are favored.

The **CLEANING** section is dedicated to references for cleaning and professional hygiene (mainly services - bathrooms - public and professional).

The segment relating to **WASTE SORTING** brings together products conceived with the aim of encouraging a waste sorting system that facilitates recycling and the reduction of pollution.

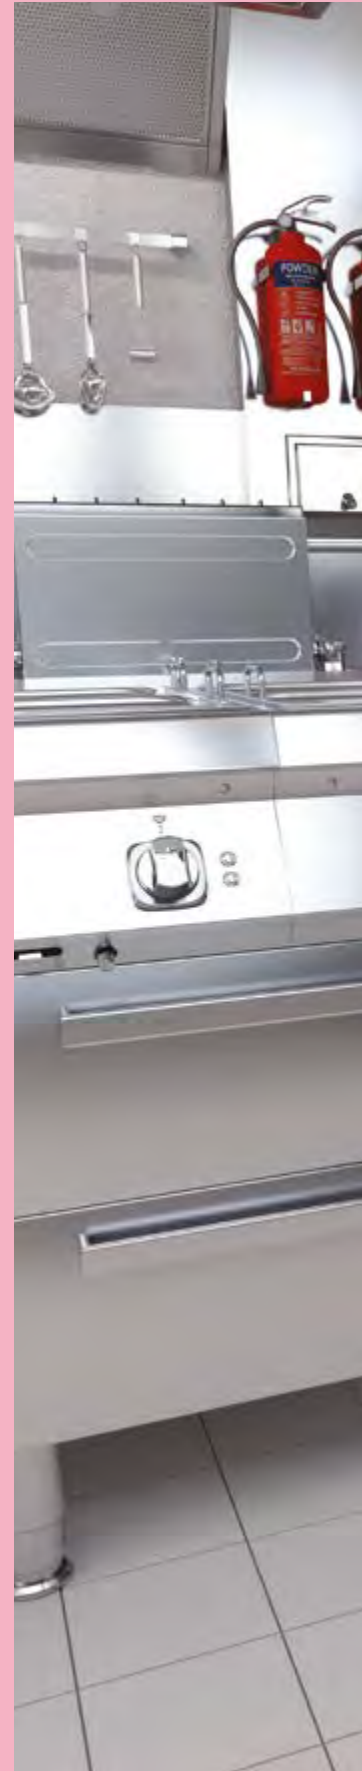

The **COMMON AREAS** segment brings together a category of more generic products designed to facilitate waste management in public spaces (offices, hotels, etc.).

ROME

WASTE PAPER BIN WITH A **CURVED** **SILHOUETTE** FOR SEPARATE COLLECTION

An **elegant recycling** station designed to facilitate separate collection in public spaces with a heavy flow of people. It stands out for the **refined material used**, powder-coated galvanized steel, with three collection points distinguishable on the basis of the type of waste to be allocated. Its sinuous shape and the use of the precious gloss paint give ROME a decorative as well as functional presence. Ideal for covered outdoor areas, entrances, offices, hotels, shopping centers and public facilities. Includes colored stickers to facilitate waste separation.

Adhesive labels kit:

- Galvanized steel case
- Polyester powder coating matte black (RAL 9005)
- Three upper delivery openings
- Coloured adhesive labels for waste separation - included (x 7 colours)
- Holds three wire sack holders
- Adjustable feet
- Optional, PVC stickers for waste sorting (page 75)

BOB COLOR

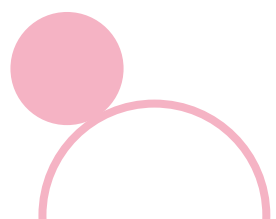

THE EVERGREEN SOLUTION FOR WASTE COLLECTION

A product range that never goes out of fashion thanks to its **minimalist and elegant shapes** that make it evergreen. It stands out for its **versatility**.

This is our range of single-flush containers for separate collection in **medium-traffic indoor areas**.

Designed to be **arranged in series or in batteries** by means of a connecting bracket (sold as a separate accessory), BOB containers make it possible to create **functional and elegant collection islands**.

The dominant black body is defined by a melange of different lid colours - grey, blue, yellow, red, green and brown -.

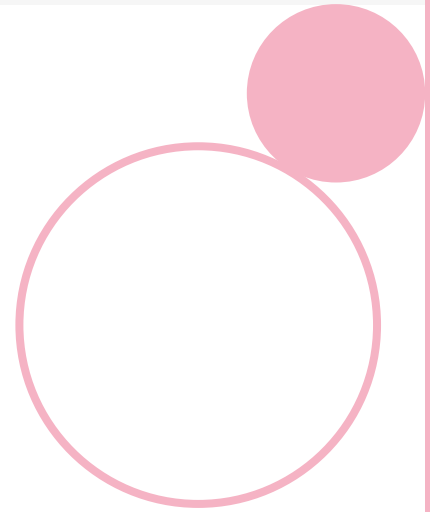

CARDBOB

OUR FIRST **100% RECYCLABLE** CARDBOARD WASTE BIN

Our first **100% recyclable** cardboard called CARDBOB.

You can combine the waste paper bin with the **painted metal lids** in the colour of your choice and with the **pre-punched stickers** to create a colourful recycling island.

The waste paper bin can be customised with personalization in **3 well-defined pantone colours**, (flexographic printing).

GRISÚ

THE METAL CONTAINER SAFE, FUNCTIONAL AND ELEGANT

The **GRISÚ** metal container is designed with special attributes. Its shape and **safety** features make it suitable for use in public environments such as shopping centers, shops, restaurants and other meeting places.

The **CNPP certification** categorizes the product as **self-extinguishing and fire retardant**. This regulation is particularly important in places where the protection of customers and staff must be particularly preserved.

The **non-scratch rubber** base and the **low-slung lid** can help prevent accidents and damage to floors and surrounding surfaces.

Our fire container is designed to be not only functional, but also aesthetically pleasing. Its cylindrical shape gives the product composure.

WASTE MANAGEMENT

OUTDOOR AREAS

This area dedicated to WASTE MANAGEMENT is oriented towards solutions for **OUTDOOR SPACES**.

The classification in this section is always based on the **intended use** of the product through the identification of the subcategories WASTE SORTING and COMMON AREAS.

The section on **WASTE SORTING** includes an accurate offer of street furniture separate collection stations that promote cleanliness and orderliness in the environment.

The **COMMON AREAS** sub-chapter is designed to contribute to urban decorum through the presentation of waste collection stations in city contexts (parks, city centers, pavements, gardens, etc.).

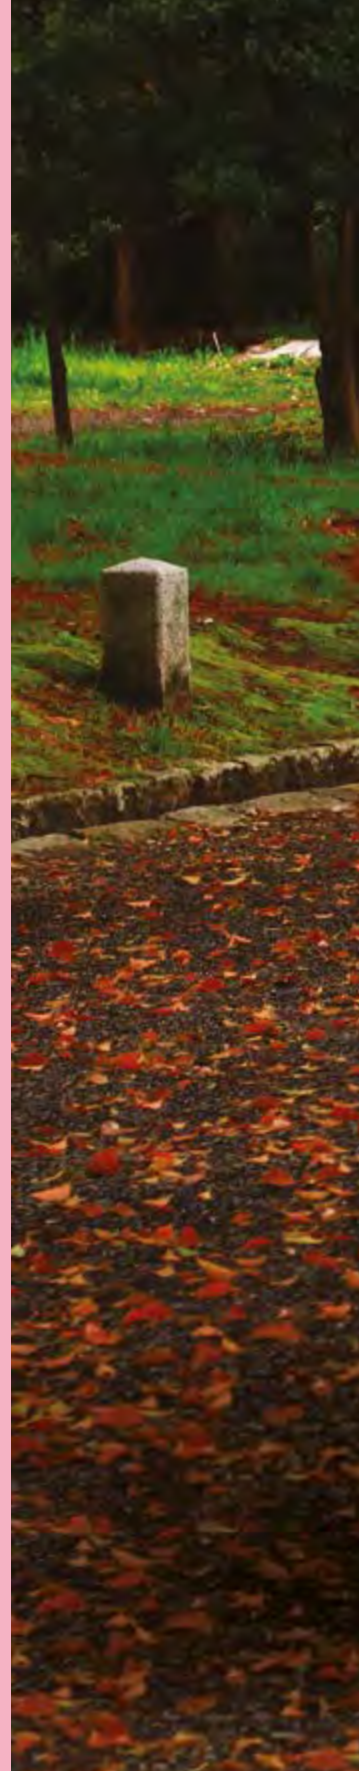

WASTE MANAGEMENT

OUTDOOR AREAS

WASTE SORTING

TRYVIA

PARKS ARE THE SOUL OF A CITY: OUTDOOR CONTAINERS FOR SEPARATE COLLECTION

Tryvia, the winged container. Attractive, colourful and eye-catching. The Tryvia waste station facilitates waste sorting thanks to the **cylindrical flows made of perforated sheet metal** in the shape of a wave, allowing **the type of waste** to be deduced inside to be guessed through colour and perforation. An additional highlight is the keyed lock, which allows for **safe and convenient** management of emptying, preventing unauthorized access. The **lively and curious** style in combination with **functionality** will give joyful nuances to the target environment. The new litter bin is distinguished by its clean and modern design, which blends harmoniously with urban architecture, contributing to a more decorous and orderly environment.

VERONA

THE RECYCLING STATION WITH A **COMPACT** AND **ESSENTIAL** DESIGN

Capacity, functionality and modernity are the hallmarks of our compartmentalized waste container for waste separation in medium and high traffic indoor and covered outdoor areas.

VERONA features a **compact and essential design**. The shining different types of waste supported by different steel wire holders, with 120 or 160 L total maximum capacity.

The VERONA container makes it possible to create a collection station with elegant features.

HYGIENE

HYGIENE FOR MEDIAL IS THE IMPLEMENTATION OF INDIVIDUAL AND COLLECTIVE MEASURES TO SAFEGUARD THE MAINTENANCE OF CLEANLINESS IN LIVING AND WORKING ENVIRONMENTS.

The key aspects that form the basis of hygiene in our industry are the cleaning and disinfection of surfaces, the management of waste and unwanted and pollutant substances, the control of insect infestations, the maintenance and care of personal and environmental equipment.

MEDIAL **offers solutions that support people in the cleaning, management, control and maintenance of hygienic common spaces** (bathrooms, hotels, offices, etc.).

Within this introductory hat, Medial identifies four leading sections that guide the choice of the right product according to different needs: **DISPENSERS and HOTEL ACCESSORIES, HAND DRYERS and HAIR DRYERS, PERSONAL CARE and ENVIRONMENTAL CARE.**

STILECO RANGE

Medial continues its quest for **sustainable solutions** that respect the environment and the needs of its customers, with the aim of **combining efficiency and aesthetics with sustainability**.

Stileco is our first line of dispensers made of 100% recycled plastic.

A range of dispensers with an **essential and versatile** character that expresses **personality**, embellished by the "green leaf" control display to once again underline the commitment to "Green".

Practicality and functionality complete the picture of a perfect range for those who want to improve the style of their environment while respecting our planet.

NENYA

WALL MOUNTED BATH DISPENSER, ESSENTIAL ALLY FOR PERSONAL HYGIENE

Our first line of rechargeable shower dispenser (white), whose name is **Nenya**, presents a capacity of 300 ml with wall support in ABS (black). It has been launched at the InterClean's fair show in Amsterdam. The product was thought and presented as **courtesy line** mainly for the hotel chains but also for other potential use (kitchen, restaurants etc...). We would like to invite you to find out more about our dispenser's range that allow us to avoid the use of single dose disposable cosmetic products, to be given the chance for a **more rational and eco-friendly use** of shower gel, shampoo, and conditioner. Our new reference stands out by a **key with high magnetic force** magnets and its circular form with hollow enables us to **avoid stagnation** of liquid (shower gel, shampoo etc...), encouraging a **more hygienic use**.

HYGIENE

HAND & HAIR DRYERS

HAND DRYERS

SELECTION GUIDE

Hand dryers have become more and more popular in public restrooms as a valid alternative to conventional drying systems. Although the implementation of these devices is shown to be a viable and effective solution in many environments, it may be quite hard to choose the product which best fits the facility's needs. The reason for this lies in the fact that there are many types of hand dryers available on the market and they differ from one another in terms of technical, functional and aesthetic features. Thus, you will never find the perfect hand dryer for a given context of use, but the one which best meets the requirements for the job.

There are six factors to be considered while choosing a hand dryer:

- 1 **the flow of people** using the public restroom, estimated in terms of daily frequency of use and concentration of device activation throughout the day
- 2 **budget**, in which you have to include the device purchase price as well as the operating costs due to maintenance and power consumption
- 3 **hand dryer's performance**, in terms of drying speed and quietness
- 4 possible **risks of vandalism**
- 5 **compliance with hygiene standards**
- 6 aspects related to **design**

	HIGH TRAFFIC AREAS	MEDIUM TRAFFIC AREAS	LOW TRAFFIC AREAS
JET DRYERS	 Twister	 Zefiro	 Mini Zefiro
SMART DRYERS	 Kari X-Dry X-Dry Compact Bayamo	 Mocka Dry Max UV Zefiro Pro UV Zefiro Hot	
TRADITIONAL HAND DRYERS		 Hamet Arielimp	 Qibli Alisé

To better meet the needs of different user segments and environments, Medial International has completed its bathroom accessories offer with two ranges of hand dryers.

Jet hand dryers take advantage of advanced motor technology, capable of circulating air at very high speed and so eliminating the water on the hands quickly. The main features of this range are high drying speed and considerable energy saving.

Smart jet hand dryers combine the high-powered jets of air to rapidly blow water off the hands with drying comfort of traditional dryers, using a heating element to warm air.

Traditional hand dryers: are equipped with a heating element, which immediately and constantly warms up the air while passing through it. These are ideal solutions for those who prefer tradition to innovation.

COMPARATIVE CHART

	Rated power	Heater	Air temperature	Noise level	Air filters	Drying time
Twister	1.750 W	x		80 dB	EPA E11 (on request)	12 - 15 sec.
Kari	1.450 W (AC) 1.300 W (B-less)	ON-OFF 550 W		78 dB	HEPA H11 (standard)	5 - 10 sec.
X-Dry	1.800 W (B-less)	ON-OFF 600 W (B-less)		75 dB	EPA E11 (standard)	12 - 15 sec.
X-Dry Compact	1.450 W	ON-OFF 350 W		75 dB	EPA E11 (standard)	12 - 15 sec.
Bayamo	1.900 W	ON-OFF 1.000 W		72 dB	AIR FILTER (standard) HEPA H11 (optional)	10 - 12 sec.
Mocka	1.350 W	ON-OFF 800 W		72 dB	AIR FILTER (standard)	12 - 15 sec.
Dry Max UV	450 - 1.000 W	ON-OFF 225 - 500 W		68-75 dB	EPA E11 (standard)	15 sec.
Zefiro Pro UV	1.100 W	ON-OFF 550 W		75 dB	EPA E11 (standard)	12 - 15 sec.
Zefiro	1.100 W	x		80 dB	EPA E11 (optional)	15 sec.
Zefiro Hot	1.100 W	550 W		75 dB	EPA E11 (optional)	15 sec.
Mini Zefiro	900 W	500 W		70 dB	EPA E11 (optional)	20 sec.
Hamet	2.400 W	2.200 W		70 dB	x	35 sec.
Arielimp	2.500 W	2.250 W		70 dB	x	35 sec.
Qibli	1.850 W	1.785 W		60 dB	x	50 sec.
Alisé	1.800 W	1.700 W		54 dB	x	50 sec.

MAINTAINANCE:

The cover must be cleaned regularly by using a mild detergent, water and a damp cloth. We recommend you choose the cleaning solution depending on the type of material to be treated. **The drain tank**, where provided, must be emptied on a weekly basis to avoid water overflows and to prevent mold and unpleasant smells from spreading.

As for dryers with brush motors, these must be replaced from time to time (on average every 1.000 hours of use) to avoid damage to motor.

The **air filter**, where provided, must be regularly cleaned with water. As for **EPA E11 filter**, it is not washable, so it must be replaced at least once a year.

As for warranty application and limitations, please consult after-sales conditions.

TWISTER

Outstanding performance and high-efficiency make Twister the ideal choice for high traffic toilets. Designed with super speedy heater-free technology, this model uses high-powered jets of air to quickly blow water off the hands. Available in silver or white finishes, Twister features a "hands-in" vertical drying style in line with current trends.

ERGONOMIC DESIGN - Twister features a wide hand drying area, opened on both sides, and a double wave-shape nozzles. This makes the dryer more comfortable and easier to use.

DOUBLE MOTOR, OUTSTANDING PERFORMANCE - Twister is operated by two brush motors which work simultaneously to reach a rated power of 1750 W. The dryer boasts a quick drying time of 12–15 seconds.

DROP-STOP SYSTEM - The special cover shape with side bars prevents water from dripping on the floor and minimizes splashes. This helps keep restrooms always clean and tidy.

DRAIN TANK - The unit incorporates a built-in drain tank that catches water droplets coming off users' hands. Being removable, the tank can be easily empty and clean, to avoid overflows, mold and bad smells.

Electrical specifications

Number of motors	2
Motor type	Ac brush motor
Total power	1750 W
Motor power	2 x 875 W
Heating element power	No heater
Voltage	220-240 V
Frequency	50-60 Hz

KARI

"Pro" version available with BRUSHLESS motor

Thanks to its revolutionary and innovative design, Kari enriches and extends our range of electric hand dryers further. Ideal in high traffic areas, this new smart jet dryer offers an ultra fast drying experience (5-10 seconds), facilitated by the horizontal frontal opening. The product is available in the "Easy" version, with AC motor, and in the "Pro" version, with brushless motor.

AC or BRUSHLESS - The "Easy" version is supplied with an AC current motor, for a better quality-price ratio. The "Pro" version includes a brushless motor, which guarantees excellent performance and less wear over time.

360° CIRCULAR DRYING ZONE - The dryer is equipped with a large circular drying compartment. The air flow is delivered at 360°, allowing an ultra fast drying in a few seconds.

INTEGRATED ADJUSTMENT PANEL - Specific selectors allow you to activate or deactivate the heater (ON / OFF); adjust the motor power by choosing between three air speeds (Low, Medium, High).

ABSORBENT CERAMICS - The drying compartment is equipped with a ceramic plate that can absorb up to 70 g of water and withstand about 280 complete drying cycles per day.

HEPA FILTER (STANDARD) - The appliance is equipped as standard with an HEPA H11 filter, which guarantees protection against 97,66% of bacteria present in the air used during drying.

X-DRY

X-Dry is a next generation smart dryer designed for medium-high traffic toilets. Available with brushless motor, the product boasts excellent drying performance, using high-powered jets of air to rapidly blow water off the hands. X-Dry also incorporates a heating element capable of warming the air stream instantaneously.

BRUSHLESS MOTOR - X-Dry Pro incorporates a brushless motor for higher performance, less maintenance and top energy saving.

ADJUSTABLE HEAT CONTROL - To offer higher efficiency and greater comfort in use, the heater can be activated or deactivated according to preferences. The ON/OFF button is located at the bottom of the unit.

OVERHEATING PROTECTION - X-Dry has an in-built sensor system capable of deactivating the heating element when the air heat output reaches 30°.

DRAIN TANK - The unit incorporates a drain tank with overflow pump that catches water droplets coming off users' hands. Being removable, the tank can be easily empty and clean to both avoid overflows and bad smells.

DOUBLE EPA FILTER (AS STANDARD) - X-Dry comes as standard with two EPA E11 filter, which purify the air by trapping up to 97,66% of dust micro-particles, pollen and bacteria suspended in the incoming air flow.

Electrical specifications

Number of motors	1
Motor type	Digital Brushless
Total power	1.800 W
Motor power	1.200 W (BRUSHLESS)
Heating element power	600 W (BRUSHLESS)

X-DRY COMPACT

X-Dry Compact is a smart dryer designed for medium-high traffic areas. Extremely compact in size but ergonomic in design, it offers outstanding performance with a drying time of only 12–15 seconds. To conserve energy and optimize hygiene, it also incorporates an intelligent switchable heating element for hot/cold airflow as well as a UV lamp that sanitizes the drain tank.

ULTRA-COMPACT DESIGN - Thanks to its compact size, X-Dry Compact can be easily fitted in any washroom. It's a great choice for small toilets having very tight spaces or where multiple units are required.

ADJUSTABLE HEAT CONTROL - To offer higher efficiency and greater comfort in use, the heater can be activated or deactivated according to preferences. The ON/OFF button is located at the bottom of the unit.

UV STERILIZATION - The dryer is equipped with a special ultraviolet lamp for improved bacterial control. The device is placed close to the drain tank, allowing to collect purified water.

DRAIN TANK - The unit incorporates a built-in drain tank with overflow pump that catches water droplets coming off users' hands. Being removable, the tank can be easily empty and clean to both avoid overflows and bad smells

DOUBLE EPA FILTER (AS STANDARD) -X-Dry Compact comes as standard with two EPA E11 filter, which purify the air by trapping up to 97,66% of dust micro-particles, pollen and bacteria suspended in the incoming air flow.

BAYAMO

Blowing water from hands in less than 10 seconds, Bayamo is one of the most efficient and powerful 'hands-in' dryers on market. Super-reliable and perfect to handle heavy crowds in high traffic washrooms, this device combines top-notch technology with cutting-edge functionality. It incorporates an air sensor which detects ambient temperature, then automatically adjusting the heater.

ENHANCED HYGIENE - The shell incorporates anti-microbial and anti-UV technology, inhibiting the growth of bacteria. It is also equipped with two UV LED devices which sanitize the air stream both in the air intake and output area.

INTEGRATED ADJUSTMENT PANEL - In-built switchers allows to choose the operation mode. You can activate/deactivate the unit (ON/OFF); switch the heating element ON/OFF for instant hot air flow; adjust airflow speed (HIGH/LOW).

DRYING CYCLE QUICK CHECK - A LED screen is placed on top of the dryer, allowing the user to quickly check the drying cycle status, while two LED indicators show when the unit is working and when an error occurs.

DRAIN TANK - Bayamo incorporates a built-in drain tank with overflow pump that catches water droplets coming off users' hands. Being removable, the tank can be easily empty and clean to both avoid overflows and bad smells.

AIR/HEPA H11 FILTERS - The dryer comes as standard with a washable air prefilter. It can also incorporate a replaceable HEPA H11 filter, which traps up to 97,66% of dust micro-particles suspended in the incoming air stream.

Electrical specifications

Number of motors	1
Motor type	Ac brush motor
Total power	1900 W
Motor power	900 W

MOCKA

Suitable for medium traffic toilets, Mocka has a sophisticated and unconventional design since it incorporates a contoured water collection tray which catches droplets. Mocka performs as a jet dryer while offering the highest level of comfort as traditional devices do. It's also safety, as it includes a protection against overheating, overload and short-circuit.

ANTIBACTERIAL PROTECTION - The shell incorporates a special antimicrobial additive to inhibit bacteria growth. The touch-free automatic activation promotes hand hygiene, without the risk of cross-contamination by touching buttons.

ADJUSTABLE HEAT CONTROL - Depending on the user's preferences or season, the heating element can be switched on or off by pushing the dedicated controller placed on top of the drying zone area.

LED INDICATORS - The front panel includes two LED indicators, emitting green and blue light, that shows when the unit is turned on and when an error occurs.

DRAIN TANK - Water is collected in a reservoir with level window. Being removable, the tank can be easily empty and clean, to avoid overflows and to prevent mold or bad smells from spreading.

AIR FILTER (STANDARD) - The unit comes as standard with a washable air filter, ensuring protection against dust microparticles as well as other pollutants suspended in the incoming air stream.

Electrical specifications

DRY MAX UV

AVAILABLE IN AR ON **MEDIAL APP**

Dry Max UV is a smart dryer for medium-high traffic locations. The possibility to set the air temperature allows considerable energy savings. Maximum hygiene standards are guaranteed by the presence of an antibacterial UV lamp and a EPA filter that purifies the incoming air flow.

TOUCHLESS TECHNOLOGY - The unit automatically turns on when hands pass under the infrared sensors installed in the drying area. The touch-free activation promotes hand hygiene, without the risk of cross-contamination.

ADJUSTABLE HEAT CONTROL - To offer higher efficiency and greater comfort in use, the heater can be activated or deactivated according to preferences. The ON/OFF button is located at the bottom of the unit.

UV STERILIZATION - The unit is equipped with a special ultraviolet lamp for improved bacterial control. The device is placed inside the dryer to purify the air stream.

ADJUSTMENT VARIATOR - The dryer is equipped with a variator to adjust motor speed. This component impacts on the engine RPM and therefore on the noise level of the unit.

EPA FILTER (INCLUDED) - The unit incorporates a replaceable EPA filter, which purifies the air by trapping up to 97,66% of dust microparticles and bacteria in the incoming air flow.

Electrical specifications

Number of motors	1
Motor type	Ac brush motor
Total power	450 - 1.000 W
Motor power	225 - 500 W
Heating element power	225 - 500 W (ON-OFF)

ZEFIRO PRO UV

By incorporating additional and more advanced features, Zefiro Pro UV expands our offer even further. Designed for medium-high-traffic areas, this smart dryer includes an antibacterial UV lamp. Thanks to this last feature, Zefiro Pro UV is suitable for installation in sensitive locations, such as hospitals and food areas.

ENHANCED COMFORT - The drying zone with air-cone outlet shape is wide and easily accessible, making hand drying more comfortable for the majority of people while waiting.

INSTANT HOT AIR - The unit is equipped with heater, which allows you to regulate the air flow (hot or cold) according to seasonal needs or customer's preferences.

UV STERILIZATION - Zefiro Pro UV is equipped with a special ultraviolet lamp for improved bacterial control. The device is placed inside the dryer to purify the air stream.

VANDAL PROOF - The stainless steel covers are designed to withstand tampering or impacts of blunt objects thrown vigorously by vandals. These kind of covers are ideal to avoid vandal-attacks as well as in high traffic areas.

EPA FILTER (STANDARD) - Zefiro Pro UV may incorporate a replaceable EPA E11 filter which purifies the air by trapping up to 97,66% of dust microparticles, pollen and bacteria suspended in the incoming air flow.

Electrical specifications

Number of motors	1

ZEFIRO

Zefiro is the broadest and most complete range of hand dryers in the "jet" category. Great for medium-high traffic toilets, it incorporates a 1.100 W cost-saving brush motor, offering an ultra-fast drying time in just 15 seconds. This range is available in a wide variety of materials, finishes and air outlet shapes.

CONE OR BLADE AIR OUTLET - The dryer is available in two different outlet shape versions. The cone outlet shape conveys the air flow evenly, while the blade outlet shape makes the drying area wider.

TOP EFFICIENCY AND ENERGY SAVING - For even greater efficiencies, Zefiro has no heating element. It uses jet streams of air to dry hands in 15 seconds. Auto turn-on thanks to infra-red sensors.

SOPHISTICATED DESIGN - Thanks to its modern and sleek shape, Zefiro perfectly fits into all architectural styles. The covers rounded lines makes Zefiro easier to clean.

VANDAL PROOF - The protective aluminium outer shells are designed to withstand tampering or impacts of blunt objects thrown vigorously by vandals.

EPA FILTER (AS OPTION) - Zefiro may incorporate a replaceable EPA E11 filter which purifies the air by trapping up to 97,66% of dust microparticles suspended in the incoming air flow.

Electrical specifications

ZEFIRO HOT

Unlike the other dryers from the same range, Zefiro Hot includes a 550 W heater which allows to warm the drying flow from the first instants of use. Entirely designed and manufactured in Italy, this dryer is operated by a reliable 550 W brush motor. Delivering a powerful airflow at an output speed of 250 km/h, Zefiro Hot offers perfect drying in just 15 seconds, while optimizing energy consumption.

ENHANCED COMFORT - The drying zone with air-blade outlet shape is wide and easily accessible, making hand drying more comfortable for the majority of people while waiting.

INSTANT HOT AIR - Zefiro Hot is equipped with heater, an element that allows for the instantaneous preparation of hot air contributing to increased comfort during the winter.

VANDAL PROOF - The aluminum covers are designed to withstand tampering or impacts of blunt objects thrown vigorously by vandals. These kind of covers are ideal in high traffic areas.

SOPHISTICATED DESIGN - Thanks to its modern and elegant shape, Zefiro Hot perfectly fits into all washrooms. The covers rounded lines makes Zefiro Hot easier to clean.

EPA FILTER (AS OPTION) - Zefiro Hot may incorporate a replaceable EPA E11 filter which purifies the air by trapping up to 97,66% of dust microparticles suspended in the incoming air flow.

MINI ZEFIRO

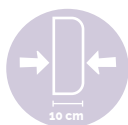

Mini Zefiro is the ideal solution for any small restroom requiring an efficient drying system. Operated by a heater-free 900 W motor, this dryer is even more powerful and cost-effective when compared to larger models in the same segment. A great choice for medium-low washroom environments, Mini Zefiro perfectly dries the hands in just 20 seconds.

ENERGY-SAVING - Designed with super speedy technology in mind, Mini Zefiro is operated by a powerful 400 AC motor, incorporating a 500 W heating element. This massively lowers the energy consumption.

INSTANT WARM AIR - To offer a greater comfort in use, the dryer incorporates a heater that instantly warms the air during hand drying operations.

ULTRA-COMPACT DESIGN - It comes with an ultra-compact shape, only 10 cm depth. Nevertheless, the wide cone nozzle design spreads airflow across a large area, ensuring both hands are dried at the same time.

AUTOMATIC ACTIVATION - The dryer is equipped with an effective infrared sensor which detects the hands placed below the dryer, thereby activating a 200 km/h air stream.

EPA FILTER (AS OPTION) - Mini Zefiro may incorporate a replaceable EPA E11 filter which purifies the air by trapping up to 97,66% of dust microparticles suspended in the incoming air flow.

HAMET

Hamet is the most popular and requested conventional hand dryer, so much so that it represents a standard in terms of performance, reliability and security within the traditional dryer category. Operated by a powerful 2.400 W motor with a heating element, Hamet offers a quick and comfortable drying experience. A great choice in leisure facilities and gas stations.

EASY TO USE - It offers a conventional "hands-under" drying style. The dryer comes with a 360° rotating nozzle, enabling users with varying levels of mobility to dry themselves comfortably and effectively.

INSTANT HOT AIR - The dryer incorporates a heater, an element that allows for the instantaneous preparation of hot air contributing to increased comfort during the winter.

TWO TYPES OF ACTIVATION - The automatic version takes advantage of infrared sensors to detect the hands once placed under the blower. Hamet is also available with a traditional push button activation.

ADJUSTABLE TIMER - The push-activation version also incorporates an adjustable timer which allows to set the drying time from 30 seconds to 3 minutes.

VANDAL PROOF - The protective steel outer shells are designed to withstand tampering or impacts of blunt objects thrown vigorously by vandals.

ARIELIMP

Arielimp is a traditional hand dryer equipped with a sturdy vandal proof steel cover. Designed for medium-high traffic environments, this device is operated by a powerful brush motor which produces an abundant warm air flow passing through a wide nozzle. It comes with an infrared sensor for handsfree use and a built-in safety feature to automatically shut the dryer off after 180 seconds.

COMFORT IN USE - Arielimp offers a conventional "hands-under" drying style. The drying zone is wide and easily accessible by anyone, enabling users with varying levels of mobility to dry themselves effectively.

INSTANT HOT AIR - The dryer incorporates a heater, an element that allows for the instantaneous preparation of hot air contributing to increased comfort during the winter.

TOUCHLESS TECHNOLOGY - Arielimp automatically turns on when hands are placed underneath the air outlet. The touch-free automatic activation promotes hand hygiene, without the risk of cross-contamination.

VANDAL PROOF - The stainless steel covers are designed to withstand tampering or impacts of blunt objects thrown vigorously by vandals. These kinds of covers are ideal in high traffic areas.

360° ROTATING NOZZLE - The dryer comes with a 360° rotating nozzle, enabling hands, faces, hair or clothes to be dried safely and easily. This feature makes Arielimp great for leisure facilities and gas stations.

Electrical specifications

Number of motors	1
Motor type	Ac brush motor

QIBLI

Qibli is a traditional hand dryer with a sleek and contemporary design. Great in medium-low traffic toilets, it works diligently drying hands in about 50 seconds. Qibli is available in three different finishes, while there are two types of activation. This is the ideal solution for those who look for a reliable and quiet hand dryer, at a fair and value-for-money ratio.

RELIABLE - Qibli is operated by a brushless motor. This technology not only extends the dryer life cycle, but it also helps minimize maintenance, as it does not incorporate consumable parts to replace over time.

INSTANT HOT AIR - The dryer incorporates a heating element that is designed to instantly warm the air stream coming from the blower as soon as the device is activated.

TWO TYPES OF ACTIVATION - The automatic version takes advantage of infrared sensors to detect the hands once placed under the blower fan. It is also available with push button activation and adjustable timer to set the drying time from 30 sec. to 3 min.

COMPACT SIZE - Thanks to its compact size, Qibli boasts many flexible installation options. It's great choice for small toilets having tight spaces or where multiple units are required.

QUIET - By delivering an air volume of 45 l/s dispensed at a maximum speed of 80 km/h, this dryer ensures an effective but also silent drying, as it emits just 60 dB of noise whilst operating.

Electrical specifications	
Number of motors	1
Motor type	Ac brushless motor

ALISÉ

Cost-saving, compact and quiet. Alisé is a traditional hand dryer operated by a reliable brushless motor. Automatically activated by infrared sensor, the unit emits an hot air flow which passes through a very wide outlet hole located at the bottom of the dryer. Alisé offers a perfect balance between performance and aesthetic, for a very reasonable price.

BRUSHLESS TECHNOLOGY - Alisé is operated by a brushless motor. This technology offers incredible efficiency and increased power delivery, resulting in less wear and increased longevity of the dryer.

INSTANT HOT AIR - To offer a greater comfort in use, the dryer incorporates a heater that instantly warms the air during hand drying operations.

TOUCHLESS TECHNOLOGY - Alisé automatically turns on when hands pass under the infrared sensors installed in the drying area. The touch-free activation promotes hand hygiene, without the risk of cross-contamination.

OVERHEATING PROTECTION - When infrared sensor is blocked for a long time, blower fan has a breakdown, or the dryer temperature exceeds safety limits, the overheating protection stops the dryer automatically.

ULTRA QUIET - Emitting just 54 dB of sound while operating, Alisé is one of the quietest hand dryers currently available on market. A great choice for noise-sensitive environments such as small restaurants.

MILADY

THE RANGE OF **SANITARY PADS DISPENSERS**

Medial enhances the **female universe**. This sense of closeness takes shape through the introduction of a new product conceived with the aspiration to be functional and reassuring in times of need, **providing a concrete help that can mitigate a possible feeling of unease**. Medial is pleased to launch Milady, its first dispenser for women's sanitary pads with three different possibilities of use depending on the need. The product can be used in public toilets of schools, hospitals, offices, restaurants, hotels and in all situations of possible usage.

AIR FRESHENERS

MAKE YOUR SPACE UNIQUE WITH THE RIGHT SCENT

Medial scent diffusers are an **elegant and sophisticated** way to create a unique and **welcoming atmosphere** in rooms. They are designed to release a constant, gentle fragrance.

The ranges dedicated to room scenting (**SOFFIO and BASICA**) have been expanded with devices such as **EXPLOSION atomisation technology**. An **innovative way to diffuse distinctive fragrances and create special olfactory atmospheres** in small-medium-large spaces.

The diffusers in the **EXPLOSION range** ensure a more **homogeneous and long-lasting fragrance** by **exploiting a sophisticated micronising technology** that converts the liquid fragrance into an extremely fine and impalpable cloud of perfume.

The Wi-Fi version, available with an elegant black casing, allows easy management of the device even remotely. In fact, the built-in connection module allows fast and absolutely customized programming.

EXPLOSION also extends the offer to **liquid fragrances**: soothing the room with the aroma of Green Tea, refreshing it with the breeze of Ocean Water and sweetening it with the **new Vanilla fragrance!**

From the skilful work of our expert perfumers, the **Malia range** was born several years ago and has expanded over time. It is a **professional line of highly concentrated, long-lasting air fresheners**. Twelve distinct quality fragrances, innovatively formulated to enhance the atmosphere in dedicated spaces, creating memorable olfactory experiences.

VICISAN

HYGIENIZER DISPENSER FOR TOILETS/URINALS

Vicisan was created with the desire to build an increasingly **hygienic and healthy** environment in public spaces. It is a range of dispensers-automatic and mechanically operated-for the constant **hygiene of public toilets and urinals**. It features a **waterproof design** that provides an increased barrier against moisture and chemical corrosion. It is designed with the intention of maintaining **freshness and cleanliness** through fragrances that **neutralize odors**.

VICISAN

AUTOMATIC HYGIENIZER DISPENSER FOR TOILETS/URINALS

400 ml ▶

230 mm

FLYING INSECT KILLERS

Medial's offering of flying insect killers was **expanded and improved** with products with more modern and minimalist shapes **in line with the new European standards**. In September 2021, the new European regulation for lamps and light sources came into force, setting out the eco-design requirements of the Single Lighting Regulation. This regulation specifies a minimum performance threshold for light sources and leads to the phasing out of non-compliant conventional lighting technologies. This regulation was accompanied by a second one that recalibrated the energy efficiency class scale (from A to G)..

The use of the **LED lamps** you will find in the Medial catalogue, which are **equipped with the manufacturer's exclusive and patented technology**, makes it possible to halve electricity consumption compared to traditional actinic lighting.

The high level of technology of the LED lamps in this catalogue makes it possible to safely replace old technology:

- **maintaining the usual lighting level**
- **achieving enormous energy savings**
- **considerably prolonging the life of the lamp**

FURNISHING ACCESSORIES

This category represents our **growth area** and will be replenished over the years with the aim of having an **increasingly specialist catalogue in the generalist sphere**.

The products presented represent **quality décor and equipment solutions for cosy offices and professional spaces that combine functionality and style**.

The great novelty of entrance mats provides an extended range of furnishing accessories that not only contribute to the decorum, safety and cleanliness of the environment, but also enriches our product portfolio with certifications related to eco-sustainability.

ENTRANCE MATS

An entrance mat is a simple but effective way to **protect floors** from dirt, moisture and wear, helping to extend the time between cleanings. It also increases safety by preventing slips and falls on wet and slippery surfaces. By keeping dust and debris at the door, it **keeps the building clean and well maintained every day.**

PRODUCT CATEGORIES

Categories A and B represent scraping carpets, optimized for dirt absorption. These are indoor carpets that do not need to be combined with outdoor carpets. The quality of the Aqua brand - developed by 3M - thanks to the unique Twin fibre design allows it to work for both dirt and moisture absorption. **Categories C and D** are carpets made of soft materials, optimised for moisture absorption. For maximum performance in these categories, a combination with outdoor carpets might be suggested. **Category E** is intended for outdoor use and due to its characteristics, captures dirt and drains water.

AQUA 65

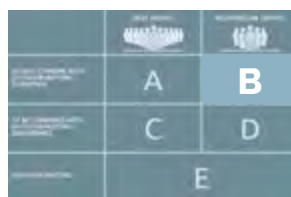

MEDIUM TRAFFIC ENTRANCE MATS

Dimensions and colours available:

- 60 x 90 cm
- 90 x 150 cm
- 130 x 200 cm

- Suitable for MEDIUM traffic volumes (500 to 1500 daily steps)
- Dual-fibre loop pile, arranged in a checked pattern
- Polypropylene thin fibres + polyamide 6 thick fibres
- Nonwoven PET/PA base
- Phthalate-free, slip-resistant PVC backing
- Superior fine dirt and moisture removal
- Excellent appearance retention
- Long lasting and Easy to clean
- Available in different colours and sizes

AQUA 45

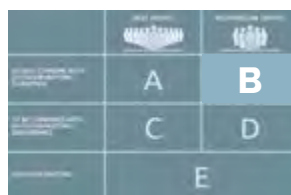

LOW TRAFFIC ENTRANCE MATS

Dimensions and colours available:

- 60 x 90 cm
- 90 x 150 cm

- Suitable for LOW traffic volumes (up to 500 daily steps)
- Dual-fibre loop pile, arranged in a striped pattern
- Polypropylene thin fibres + polyamide 6 thick fibres
- Nonwoven base of polyester and polyamide 6
- Phthalate-free, slip-resistant PVC backing
- Excellent dirt removal and water absorption characteristics
- High safety for pedestrian traffic and trolley passage
- Long lasting and easy to clean
- Available in different colours and sizes

DURATAP

MEDIUM TRAFFIC ENTRANCE MATS

Dimensions and colours available:

- Suitable for MEDIUM traffic volumes (500 to 1500 daily steps)
- The most wear-resistant coir mat
- High use class rating of 32 (commercial use)
- Fire protection class rating of Cfl -s1.
- Heavyduty, tightly tufteda
- Easy for wheelchairs and rollators
- This thick, firm coir mat has a stiff , bristly feel
- Custom-made carpets sold by metre linear

	 A	 B

DURATAP Rolls - 100 cm CUT **934100**

DURATAP Rolls - 200 cm CUT **934200**

DELTA

HIGH TRAFFIC ENTRANCE MATS

Dimensions and colours available:

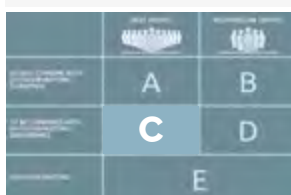

- 60 x 90 cm
- 90 x 150 cm
- 135 x 200 cm

- Suitable for MEDIUM traffic volumes (500 to 1500 daily steps)
- Made of ECONYL® or 100% regenerated nylon
- Saves more than 5 kg of CO2 emissions in production
- Contains HydroTX™ technology
- Absorbs moisture faster
- Keeps the floor inside under the carpet clean and dry
- Available in different colours and sizes

NELSON

LOW TRAFFIC ENTRANCE MATS

Dimensions and colours available:

- 60 x 90 cm
- 90 x 150 cm

- Suitable for LOW traffic volumes (up to 500 daily steps)
- Made from solution dyed polyamide assuring a very long lifetime
- Phthalate-free PVC backing, impermeable for water
- Heathered design visually hides dust and debris
- Facilitates easy vacuum cleaning
- Does not fade in sunlight and withstands aggressive cleaning chemicals
- Available in different colours and sizes

COLLECT

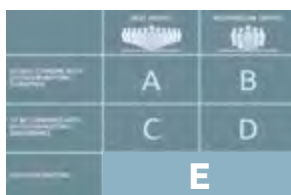

HIGH TRAFFIC OUTDOOR ENTRANCE MATS

Dimensions and colours available:

60 x 90 cm
90 x 150 cm

- Suitable for HIGH traffic volumes (1500 to 5000 daily steps)
- Conceived for an external use
- Made of 100% polyamide yarns
- Very fine scraping loop pile absorbs dirt and moisture
- Aids water drainage
- Very strong and suit for commercial use
- Available in different colours and sizes

	ANTHRACITE	BROWN	RED
COLLECT mat - 60 x 90 cm	933000	933009	933007
COLLECT mat - 90 x 150 cm	933010	933019	933017

FOR PRODUCT CARE

GUIDE TO MATERIALS AND MAINTENANCE

MATERIALS, PROCESSING AND FINISHINGS GUIDE

This short guide describes the raw material features and the types of processing used in our products' manufacturing. We indeed believe that sale effectiveness depends on information sharing with customers, enabling people to take more conscious and critical purchasing decisions.

PLASTICS

ABS

ABS is a thermoplastic resin derived from acrylonitrile, butadiene and styrene polymerization. Besides being highly recyclable, ABS is also highly-resistant to impacts, scratching and abrasions. As for its chemical resistance, ABS withstands corrosion of substances, such as water, saline solutions, acids, alkaline solutions, saturated hydrocarbons (gasoline) and mineral oils. All these features make ABS the ideal material for our range of bathroom accessories and ensure a high level of hygiene and easy maintenance.

POLYETHYLENE (PE)

Polyethylene is a thermoplastic resin derived from ethylene polymerization. Polyethylene has good mechanical properties, resulting in high tensile, flexural, abrasion and impact strength. As for its chemical resistance, it is impermeable to water and it is resistant to corrosion by chemical agents, such as saline solutions, acids, alkali, alcohol and gasoline. It may be affected by oxidizing acids such as nitric, sulfuric and halogens acids. In addition to being highly recyclable, polyethylene offers a high weathering resistance that makes this material ideal for the production of outdoor waste bins and containers.

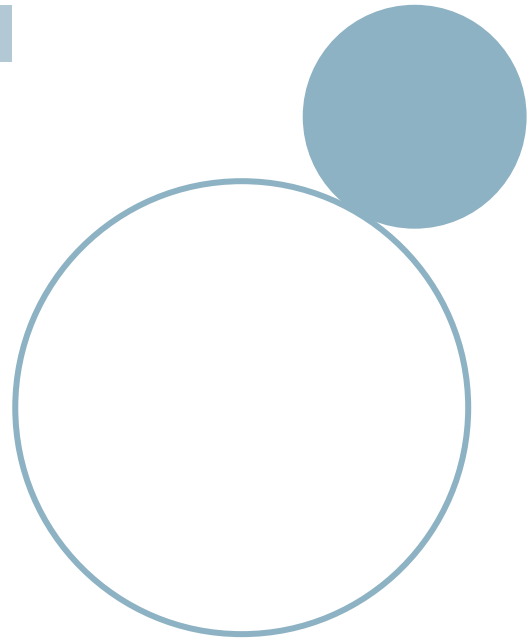

POLYPROPYLENE (PP)

Polypropylene is a thermoplastic derived from propylene polymerization. Due to its crystalline structure, this material is rigid yet lightweight. As for its mechanical properties, polypropylene is resistant to loads, tensile, impact and abrasion. Regarding to its chemical properties, this material is resistant to corrosion by saline aqueous solutions, weak acids, alkaline solutions, alcohol, certain oils and washing solutions, while it is not resistant to strong oxidizing and halogenated hydrocarbons agents.

FOR PRODUCT CARE

POLYMETHACRYLATE (PMMA)

Also known as Plexiglas®, the polymethacrylate is composed of methacrylate polymers. Particularly appreciated for its light weight, this material is also unbreakable. In fact, polymethacrylate has a good tensile, compressive and bending resistance. On the other hand, it is more sensitive to abrasion. Polymethacrylate is characterized by a great light transmission. Thanks to its technical properties, the polymethacrylate sheets are often used as an alternative to glass, especially for the production of mirrors, safety and accident prevention items.

POLYCARBONATE (PC)

Polycarbonate is a polymer obtained from the polycondensation of bisphenol A (BPA) and a carbonate or phosgene. It offers excellent mechanical properties. Polycarbonate characteristics are close to those of polymethylmethacrylate (PMMA, acrylic), with in addition a high temperature resistance. Polycarbonate offers very high transparency. Thanks to its excellent impact resistance, it is also used in the manufacture of motorcycle helmets and police shields.

EXTRUDED POLYSTYRENE (XPS)

Polystyrene is a thermoplastic polymer produced from styrene. It possesses a high impact and weathering resistance. It is also dyed and resists to UV, therefore this material is ideal for producing products for outdoor use.

MATERIALS, PROCESSING AND FINISHINGS GUIDE

METALS

STEEL

Steel is an alloy consisting mostly of iron, carbon and other elements. Its properties result from both chemical composition and manufacturing process. Despite being available in several qualities and grades, any type of steel has outstanding mechanical and chemical properties, such as strength, durability and resistance to both impacts and corrosion.

STAINLESS STEEL

"Stainless steel" is a collective term used to identify a special group of iron-based alloys, containing at least 1,2% carbon and 10,5% chromium, and other elements. Depending on the amount of the constituents in the alloy, stainless steel can be categorized in several families and subcategories. Medial International pays great attention in selecting the best stainless steels. We make use of the following stainless steel grades: AISI 201, AISI 304, AISI 430. Stainless steel is appreciated for its aesthetic qualities, as well as its strength, durability and eco-compatibility since it is 100% recyclable. But one of its most distinctive features concerns its corrosion-resistance. Stainless steel has indeed a unique self-healing property. By combining with Nickel and Molybdenum, Chrome forms a thin protective layer on surface with the assistance of Oxygen from air or water. If this thin layer is scratched, it immediately rebuilds, keeping protecting the surface from corrosion. However, the durability of stainless steel over time, whatever grades is concerned, is related to a regular maintenance and cleaning.

SURFACE TREATMENTS

GALVANIZATION

Galvanization is a process that involves the application of a zinc coating on a metal surface to prevent its oxidation. The most common process is hot-dip galvanization, which is carried out by immersing metal (iron or steel) in a bath of liquid zinc to produce a corrosion resistant, multi-layered coating of zinc-iron alloy and zinc metal. The coating forms an equal thickness on all surfaces immersed in the galvanizing kettle. This process provides a long-lasting, maintenance-free protection that slows the processes of corrosion and surface deterioration. If coating is damaged, leaving uncovered portions of the underlying material, the zinc coating acts as a sacrificial anode to avoid the formation of rust on the metal.

CATAPHORESIS

Cataphoresis is a painting technique that consists in immersing the part in a bath of water-soluble paint, connected to a cathode and by migrating particles of paint in suspension in the bath by means of an electric current of a certain tension, from the anode to the cathode. The paint particles are then applied evenly and over substantially the entire surface of the immersed part. Furthermore, the homogeneity of the coating provides good bonding layers and excellent corrosion resistance even to those areas which are hard to reach with traditional methods. If coating is damaged, leaving uncovered portions of the underlying material, the primary layer of painting acts to avoid the formation of rust on the metal. This treatment is indeed very suitable for varnishing products for outdoor use.

POWDER EPOXY COATING

Powder Epoxy Coating is a type of coating that consists in applying electro-statically dry powder and cured under heat to allow it to flow and form a hard thin layer. They have great mechanical strength and good resistance to corrosion by agents such as acids. Furthermore, the coating is hard and slightly opaque.

GENERAL SURFACE CLEANING AND MAINTENANCE*

PLASTIC

Plastic surfaces require periodic cleaning, which has to be carried out using a soft cloth soaked in warm water. If this operation is not effective, we suggest to use a dedicated cleaner for plastic parts. Pay attention to detergents containing solvents, as they may corrode and damage the material surface. As for cleaning and maintenance of polymethacrylate mirrors, we highly recommend to clean the surfaces using a specific detergents for methacrylate together with a non-abrasive cloth. Do not use paper to clean acrylic mirrors.

COATED STEEL

Cleaning is to be carried out periodically since this help keep unchanged the coating. If this is not effective, we suggest to use a mild cleaner. Pay attention to following substances as they can corrode and damage the coating: Aceton, Methylethylketon, Trichlorethan, Toluol, Trichlorethan, Xylol, hydratisierte Ammonium, Natrium-Hydrat.

STAINLESS STEEL

Proper and regular maintenance of metal products helps prevent surface oxidation, keeping the surfaces charm unchanged over time. Depending on the type of surface to maintain, we suggest to clean them periodically with a specific cleaner. As for stainless steel products, they need to be clean appropriately and periodically to remove dust, lime and dirt. As for daily cleaning operation, we suggest to clean stainless steel surfaces with a non-abrasive sponge and a mild solution, then rinse surface with warm water and wipe it with a smooth cloth. Out of ten/twenty routine cleaning operations, it is necessary to perform an extraordinary cleaning operation with a specific non-aggressive product, both creamy or spray. Several specific cleaners are also available on the market. For both ordinary and extraordinary cleaning operations, carbon steel brushes or steel wool should be avoided as they may leave particles embedded on the surface, leading to oxydation.

DISPENSERS CLEANING AND MAINTENANCE

In order to function properly, dispensers must be used with a quality cleaner and must be maintained periodically. Below, you will find some quick and practical tips to keep the product always working and in an excellent condition.

CLEAN THE DISPENSER COVER

Dispensers, especially stainless steel ones, look better over time if the outer shell is cleaned regularly. This prevents the formation of stubborn stains or oxidation points.

For **routine cleaning** it is enough to:

- Apply a mild detergent to the affected areas and rub the surface with a slightly damp cloth. In the case of satin-finished stainless steel dispensers, it is advisable to perform the operation in the direction of the satin finish;
- Rinse with warm water to remove dirt, stains or soap residues, and then dry gently with a soft absorbent cloth;
- Repeat the operation daily (or more often) depending on the severity of the product to be treated.

For **extraordinary cleaning** of the cover, you can:

- Use a 1% ammonia solution, but be careful not to return the solution too strong. Alternatively, it is possible to use a specific detergent for the type of surface treat (plastic or stainless steel). Never use bleach!
- To apply the solution, it is advisable to use a soft cloth. In the case of stainless steel dispensers, especially if satin, it is also possible to use a medium abrasive cloth (for example 3M's Scotch-Brite). Once the application is complete, rinse thoroughly with water and dry the surface with a soft absorbent cloth.

STATUS	CLEANING AGENT	APPLICATION METHOD
Dirt, soap smudges and fingerprints	Use a mild cleanser or specific detergent for the material to be treated;	Apply the cleaner. Clean the dirt with a cloth or a sponge for smooth surfaces and a soft surface brush structured. Rinse and dry.
Stubborn stains;	Specific detergent, liquid or spray for the material to be treated;	Follow the instructions given on the detergent packaging. Rinse or dry
Rust resulting from exposure to chemicals and / or environmental difficult conditions;	Bathroom cleaners containing phosphoric acid + 3M cloth Scotch Brite or equivalent	Clean the surface as indicated above, then lightly rub the area with the cloth. Clean with a suitable polish for the treated surface. Then, rinse and dry.

FOR PRODUCT CARE

PRECAUTIONS FOR STAINLESS STEEL DISPENSERS:

Although stainless steel is very resistant to oxidation and rust, there are some conditions in which it can be found due to the factors listed below:

- Detergents for acid chloride or muriatic acid (hydrochloric acid);
- Concentrated soap residue where chemical additives can cause discoloration and can potentially dry out and thus appear rusty;
- Environments where water has a high iron content or where there is contact with it (e.g. steel wool, processing shavings, iron residues or dust in the installation or when cleaning other products in steel) may leave a residue of rust. The presence of salt containing chlorides.

Remove rust or corrosion as soon as possible to avoid permanent surface discoloration and pitting.

RECOMMENDATIONS:

- Never clean stainless steel dispensers with cleaners containing bleach, chlorides, hydrochloric acid and muriatic acid. These are often found in toilet bowls or in abrasive tiles and powders.
- Never use abrasive cleaners on a shiny stainless steel surface.
- Never use steel wool, as it would scratch the finishes.
- Never use metal sponges or any other sponge that may leave rust particles on the surface.
- In brushed dispensers, clean or wipe in the direction of the satin finish.
- Do not wash them under running water, do not immerse them in water.
- Never scrape with steel tools.

FILL THE DISPENSER:

Make sure you fill the dispenser with the right type of soap, liquid, foam or disinfectant by the hands. The use of other types of liquids is not covered by our warranty. After filling, be sure to clean the liquid from the container.

KEEP THE INNER UNIT CLEAN:

Most soap dispenser problems are caused by the type of consumable used. Very thick or very concentrated soaps risk causing blockages in the delivery system, so they must be diluted with water. Excessively liquid or too diluted soaps reduce the viscosity of the soap itself with the consequent of the same from. A problem commonly encountered with soap dispensers is the use of detergents that are too basic or too acidic. Our dispensers are designed to be used with neutral PH soaps. Acid soaps (PH levels below 6.5) corrode metal parts and degrade plastic components. Basic soaps (PH levels above 8.5) also cause swelling or damage to rubber and plastic parts, as well as skin irritation.

If you use good soap, internal valve problems can be caused by a lack of maintenance. If the appliance is not used for a long period of time or if the nozzle becomes clogged, the following instructions should be followed: clean the dispenser internally at regular intervals of one week by pouring only hot water into a tank and pump gently to clean the block and remove the soap residue. In case of extreme obstruction, therefore for special cleaning, the tank must be disassembled and pumped to restore correct operation: remove both reservoirs and the pump from the dispenser or remove the dispenser from the wall if possible. (This is possible with models in which the tank is mounted in the unit); drain all soap from the tank, then immerse the tank and pump in hot water for 30 minutes. This will help remove any clean or thick soap residue. Pump the valve at least 20 times to remove any blockages while it is still wet. Once cleaned, rub the components with a cloth and reassemble them together or back up to the wall brackets, remembering to fasten the unit to the brackets and screws.

ATTENTION:

Never try to insert a pointed object (eg a pin) into the soap spout, as it could cause irreparable damage to the pump and void the warranty.

A JOURNEY OF FORTY YEARS

EXPLORE WITH US!

THANKS TO OUR:

EXPERIENCE AND RELIABILITY

We've been successfully completing projects for years, guaranteeing precision and care in every detail.

QUALITY THAT MAKES A DIFFERENCE

The highest quality materials, techniques and workmanship for excellent results.

CREATIVITY AND INNOVATION

We design solutions that combine creative vision, strategic thinking and functionality.

CUSTOMISATION

Each project is unique, and it is built around the customer's needs to enhance the product with the required brand strategy.

360-DEGREES ATTENTION

From idea to completion, we have a dedicated team, always at your side.
